

Quartz XP

bench & garden **power**

Quartz Scarlet XP

Quartz Series Verbena

XP improvements offer a consistent, tight 6 to 7-day flowering window and uniform plant habit.

XP varieties are 7 to 10-days earlier than the original Quartz varieties. Combined with the tighter flowering window, XP is also fast off the bench. Garden performance features large florets and umbles over dark green leaves on mounded plants. Well-suited to pack production, Spring and Fall planters, baskets and landscapes, Quartz performs well through both hot and cool conditions.

Scarlet XP received an excellent rating at the W. Madison Ag Research Station 2008 Feature Verbena Trial in Verona, WI.
