SALVIA
(MEADOW SAGE)
Salvia nemorosa

'BLUE MARVEL'

Height: 10 to 12 in. (30 to 35 cm)
Bloom Months: March to September
USDA Hardiness Zones: 4 to 9
Darwin Perennials
PPAF

The largest flowers of any *S. nemorosa*!

- Innovative variety can be finished as a first-year-flowering perennial.
- No PGRs needed!
- Outstanding habit and reliable reblooming for landscapes and container gardening.
- Ideal for positioning as a premium perennial item for a greater profit margin opportunity.

A Ball Seed Exclusive.

DIGITALIS
(FOXGLOVE)
Digitalis x hybrida

FOXLIGHT™ SERIES

Height: 22 to 24 in. (56 to 60 cm)
Bloom Months: April to September
USDA Hardiness Zones: 7 to 10
Darwin Perennials

Three bold novelty colors boost retail appeal and drive impulse sales.

- Lower input costs provide greater profit margin at wholesale and retail.
- First-year-flowering perennial needs no bulking for full plants.
- More compact than competing varieties, with deeper green foliage.
- Blooms all Summer long, with outward-facing flowers for better retail show.

FLOREXPO

Dear esteemed customer,

We know you are going to be as pleased as we are with the new line of products you will see here for the 2015-2016 season. All carefully curated from the world's premier breeders and brokers, these varieties give you the power to position your program for maximum potential.

Every year our commitment to producing the world's finest URCs deepens, and you will see it not only in our world-class selection, but also in our world-class facilities. A revolutionary "dry" concept helps us take cleanliness standards for our stock plants to new levels. A complete cold chain in our packinghouse raises the bar on quality, and an ongoing Lean process adoption ensures we not only meet but exceed industry standards.

For this season we are proud to announce that we have hired two new growers who bring a high level of experience, as well as two additional young growers, creating a unique balance between new blood and experience. We remain focused on setting new standards for quality and selection – no less than you, our valued customers, expect and deserve. We look forward to surpassing your expectations in this season and many more to come. Thank you sincerely for your support and trust.

Best personal regards,

Fernando Altmann Borbón

A Lantana

Nothing heats up hot spots like Lantana. The newest cultivars take sun loving to new level, outdoing each other with spectacular color displays and vigorous growth. Multi-award winner **New Gold** particularly shines, with brilliant golden yellow clusters that absolutely cover the plant from spring to fall. Low and lovely, it's great as a groundcover or basket spiller.

A Petunia

Danziger's done it again, adding hot new Petunias to an already sizzling lineup. The new **Ray** varieties bloom in a profusion of rich color. **Ray** varieties are well established in the marketplace and are known to growers for incredible garden performance, dependable plant vigor, superior heat tolerance and improved disease resistance.

Masses of vibrant trailing blooms make **Cascadias** unstoppable in baskets, borders and containers. 8-12" high and wide with over a dozen colors to choose from. Bonus: Butterflies and hummingbirds love them as much as we do.

The **Marvel Beauty** series' unique flowers, unlike any other Petunias, feature bold, yellow centers.

THE SUNTORY® COLLECTION A

Blanketing landscapes like groundcover, **Tapien** Verbenas grow up to 3' wide, crowding out weeds as they spread. Constantly in bloom, they're impervious to heat, humidity and light frosts, thriving where other Verbenas fail.

Extremely fast growing compared to traditional Verbena, **Temari** spread energetically up to 4', with large, cheerful clusters continuously blooming spring through fall.

Perfect for patios, **Temari Patios** have a habit like no other, with strong central branching that produces tall, colorful mounds. Large, vibrant flower clusters form non-stop through fall.

Orders

Ordering Information

Brokers (Main contact)

We have very close relations with several brokers in North America, Ball Seed, McHutchison, Gloeckner and Vaughan's. They are our partners and communication bridge in the industry, giving you the choice of working with your broker of preference.
For more information, please contact us at orders@florexpo.net.

Minimum order

The company has established a policy called Minimum Order Fee. The minimum order is 3,500 cuttings per customer and per week. If the order is lower, Florexpo will charge $35 fee.

Deadline

Any cancellation or reduction must be received by Tuesday at noon and additions and new orders must be received on Thursday at 1 pm CR time. After this time, we cannot apply additions or cancellations. Please contact us if you need additional information.

Availability

The product availability is updated every 20 minutes in order to give you the most reliable and on-time information. Our system is linked with our brokers in order to avoid any delays.

Claims or Florexpo Credit Policy

1. All credits and claims must be directed to the email claims@florexpo.net.
2. All credits received must include a valid Florexpo claim reason with photographs representing both the detail and magnitude of the problem. Florexpo will deny any claim with less information than requested in the claim form.
3. Florexpo will not require photographic data for any claim with a value under $50, unless it is essential to help find a solution to the problem reported (not true to type, unusual plant symptoms, etc).
4. All requests for credit (preliminary & final) must be received within 4 weeks (28 days) after the date the customer received the shipment, unless the credit is for mixed plants or not true type.
5. Florexpo will answer all credit requests in the first two weeks (15 days) after received; if not answered in this timeline, the credit will be automatically accepted.

Propagation and Licensing

Florexpo offers a collection of products that are protected and open in the different markets. All patented product needs to pay a royalty with the URC unless the customer holds a direct license. In this case we do not charge the royalty.

Protection

Protected varieties are protected by United States Plant Patent (PP#) United States Plant Patent Applied For (PPAF), Canadian Plant Breeders' Rights and Canadian Plant Breeders' Rights Applied For. Many of the plants are also protected in other countries as well as registered with the Canadian Ornamental Plant Foundation (COPF ®). ™ denotes a trademark and ® denotes a registered trademark of the respected breeder in the United States of America. It may also be registered in other countries.

Tags

Most Breeders and/or their representatives require that one label or tag be included with each plant sold indicating the proper genus, cultivar name, complete proprietary rights of the plant for all regions of potential sales (in the USA either "U.S. PPAF" or U.S Plant Patent #, in Canada either CPBRAF or CPBR#) and also require that the tag state, "propagation strictly prohibited".
To simplify the process, tags are available to order with all URCs, but with some exceptions and do not ship by default.
For most varieties, you may generate your own labels if the above information is included, or you may purchase labels from another tag printer/supplier. Some breeders require that we ship a tag by default. This information is available from your Sales Representatives, Florexpo Customer Service Representative and in published pricing documents.

Please see pages 117/118 for a list of varieties/lines that have a tag mandatory policy.
