

TECH TIP: ENERGY CURTAINS

Have you ever wondered *“When is the right time to close your greenhouse energy curtain?”* We often think that energy curtains are in place only to trap heat during the night and save energy. However, Diego Poot, Ball Horticultural Company's Plant Production Specialist for Asia, explains how energy curtains play a critical role in reducing disease pressure.

Get the most from your energy curtains by using them to (not only) save energy but also slow down your plants' temperature losses and minimize disease pressure.
