

TECH TIP: PANSY WORM

TIMELY INFO: Be on the lookout - those pretty butterflies can be leaving behind some not so plant-friendly guest. Outdoor fall crops are especially susceptible to lepidopteran pests such as this pansy worm (*Euptoieta claudia*). Scout regularly and have your pest management tools ready.

Mainspring, *Bacillus thuringiensis* ssp. *kurstaki* (Dipel, BT Now), *Beauveria bassiana* (Botanigard) and Conserve are just a few choices.
