| Available | Unrooted from Danziger, Liners available from select rooting stations |

CANARY WINGS BEGONIA CULTURE

Growing To Finish

| | | | | |
|-----------------------|---|-------------------|--|------------------------|
| Transplanting: | Liners must be placed with the growing shoot facing towards the outside of the container for optimal flower presentation. | Media: | Optimal pH: 5.4 to 6.0 | |
| Temperature: | Day: 65 to 70°F (18 to 21C) Night: 60 to 65°F (15 to 18°C) | Nutrition: | 200ppm nitrogen weekly once roots are established. | |
| Watering: | Produce on the drier side to help prevent fungus or mold-type disease. However, avoid wilting. | Light: | 3,000 to 5,000 f.c. (30,000 to 50,000 Lux) Will flower under natural day-length year round in warm climates. | |
| Scheduling | Pot Size | PPP | Spacing | Weeks To Finish |
| | 6in | 1 | 8 – 10in | 7 – 9 |
| | 8in | 1 | 12 – 14in | 8 – 10 |
| | 10 – 12in HB | 3 | 16 – 18in | 9 – 11 |
| Notes: | <ul style="list-style-type: none"> • PGRS / Pinching are neither needed nor recommended. • Foliage will scorch if grown under or placed in too high light conditions. • As plants mature the shaded and older leaves will slowly transition to chartreuse green. However, the golden chartreuse foliage is most prevalent on new growth. | | | |
