NO GARDEN? NO PROBLEM.

TABLETOP VEGGIES CONSUMERS CAN GROW INSIDE OR OUT!

PanAmerican Seed.
NEW Kitchen Minis are ready to place inside on a sunny counter or windowsill, or outside on a patio table. They are ideally sold with some ripe fruit – ‘ready-to-harvest’.

Compact NEW Kitchen Minis™ match consumer interest for indoor plants and the desire to have fresh, homegrown vegetables.

NEW Kitchen Minis will continue to produce tasty vegetables over 4 to 6 weeks, when they can be replaced with new Kitchen Minis!

WOW, THIS IS EXACTLY WHAT WE WERE HOPING FOR!

FRESH EATING

BUY. EAT. REPEAT!
# Culture Practices for Growing Kitchen Minis™ Tabletop Veggies

NEW Kitchen Minis tabletop veggie plants are easy to produce, with short crop times, compact growth habits without PGRs and longer retail shelf life.

<td>4-6”/1 ppp/10-11 wks/Spring 6-8”/1 ppp/11-12 wks/Spring</td>
<td>3-8”/1 ppp/14 wks/Spring 3-8”/1 ppp/13 wks/Summer</td>
</tr>
<tr>
<td>Key tips</td>
<td>Plant plugs deeply. Water from below to keep surface of media dry. It is especially important to grow plants dry until flowering. To optimize plant growth, space as soon as the plants touch. Keep the plants very dry from spacing to flowering to avoid stretch. Due to the weight of the fruit, we recommend staking plants to stabilize plants during shipment.</td>
<td></td>
</tr>
<tr>
<td>Fertilizer Notation</td>
<td>Especially when plants are grown very dry, it's important to use higher EC approximately once a week when plants are watered from below. Ensure sufficient Ca by the end of the crop.</td>
<td></td>
</tr>
<tr>
<td>Common Problems</td>
<td>The most common pest with capsicum is Thrips. We recommend putting up sticky cards (1 per 20-ft./6-m table).</td>
<td></td>
</tr>

**TOMATOES**

- **New Cocoa F1**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Cocoa will brighten up your windowsill or patio table, and its tidy plant habit makes it a perfect addition to your recipes!

- **New Red Velvet F1**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Red Velvet will brighten up your windowsill or patio table, and its thick-walled pepper with a mild, sweet flavor is perfect for roasting or stuffing with cheese.

**SWEET PEPPERS**

- **Micro Tate**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Narrowly conical peppers are fleshy and sweet, perfect for roasting or stuffing with cheese.

- **Siam**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Siam will brighten up your windowsill or patio table, and its vibrant red, orange and yellow peppers are great for snacking right off the plant, chopped fresh into a salad.

- **Fresh Blue Bud, Orange and Yellow**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Deliciously sweet, thick-walled peppers and small foliage make for a beautiful display.

- **Tequila**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Tequila provides beautiful red-orange and red fruit that pop out through chartreuse green, then turn red when fully mature. Use for roasting or stuffing with cheese.

**HOT PEPPERS**

- **Hot Fajita**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Broad, conical fruit is mildly hot and great for any recipe that calls for a little spice.

- **Taquito**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 14-16
  - Taquito ripens to bright red and hangs down on a medium-sized plant. Its spicy flavor makes for a spicy and great for adding to a stir-fry.

- **Jazz up your tamales and enchiladas with this crisp, juicy, dark green fruit that ripens to bright red and hangs down within a broad canopy and adds a medium amount of spice to your recipes.

- **Adobo**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Adobo is a classic pepper plant, perfect for a windowsill with dark green foliage! Thin-walled, spicy peppers are great for making paprika or pepper flakes.

- **Piñata**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Piñata offers fruit with braised savory dishes. Deliciously sweet, thick-walled pepper with a mild, sweet-spicy dish.

- **Hot Lemon**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Get ready to party with lime-green fruit that ripens to bright red. The upright, conical peppers start out chartreuse green, then continue to mature in hues of yellow, orange and red, creating a beautiful display on each plant.

- **Hot Burrito**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Hot Burrito is an eye-catching lemon-yellow fruit, with braised savory dishes. Deliciously sweet, thick-walled pepper with a mild, sweet-spicy dish.

- **Hot Joker**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - These peppers are no joke! Lime-green fruit will ripen to bright red. When left on the plant, fruit will dry down within a broad canopy and adds a medium amount of spice to your recipes.

- **Hot Fajita**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Hot Fajita is a classic pepper plant, perfect for a windowsill with dark green foliage! Thin-walled, spicy peppers are great for making paprika or pepper flakes.

- **Cosmo**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Cosmo is a classic pepper plant, perfect for a windowsill with dark green foliage! Thin-walled, spicy peppers are great for making paprika or pepper flakes.

- **Hot Lemon**
  - Plug crop time (weeks): 3-4
  - Potting to sale (weeks): 10-12
  - Get ready to party with lime-green fruit that ripens to bright red. The upright, conical peppers start out chartreuse green, then continue to mature in hues of yellow, orange and red, creating a beautiful display on each plant.
