

# 2024 CUT FLOWER DAHLIA LINERS

BaliColorLink.

Your small business partner

Ball Seed is proud to present the Karma Dahlia® series along with Café au Lait and Moon Lady, a line of **vegetatively propagated** dahlias. The cuttings are **virus-indexed** and come from a **certified, clean mother stock** program, resulting in **faster and higher production**.

The Karma Dahlia® series is characterized by it's **strong, uniform stems, upright flowers, long flowering period** and **high productivity**. These dahlias are long day plants requiring 14 hours of light per day for flower induction. The series is suited for both indoor and outdoor production. Depending upon where the dahlias are grown for cut flowers, 6 to 14 stems per square foot can be expected.

Dahlia liners usually **cost less** and are **easier to plant** than tubers. Each liner will produce a full size plant, often **blooming earlier than tubers** planted at the same time.

Café au Lait

Karma Amanda

Karma Amora Bright Scarlet

Karma Blue Lagoon

Karma Cabernet

Karma Caroline

Karma Corona Bronze

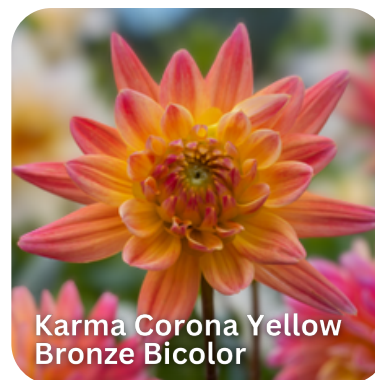

Karma Corona Pink

Karma Corona Purple

Available Weeks 1-25

- Each grower may not offer all of the varieties available and availability may vary per ship week.
- Dahlia liners have a minimum 8 week crop time; order early to ensure availability.
- WebTrack will show availability or 'TBC', and the varieties each grower offers. Some suppliers will show 'TBC' instead of actual numbers.

NOTE: These dahlia varieties are patented. Propagation is prohibited. Growers may not root additional cuttings.
