

# Amaryllis

# Southern Hemisphere

## AMARYLLIS

These Amaryllis are native to Peru - the perfect location as far as climate is concerned. The bulbs are harvested early, giving plenty of time to prepare them properly for the market. They are ideally suited for growing in pots with a wide range of bulbs of the very highest quality, allowing for sales to begin in early autumn.

*Average forcing time to market stage of development for Holland Amaryllis is 6-8 weeks. As a rule, it takes 4 weeks to flower after shoot emerges. This will vary with each cultivar and forcing period. It is also important to note that Amaryllis lots are somewhat variable and no guarantee as to flowering time can be given.*

## HYDROPONIC GROWING TRAYS

*More blooms in less space!*

EACH TRAY WILL  
HOLD AROUND  
20 AMARYLLIS OR  
80 TULIPS.
