

SB04 Controlled watering covers multiple containers at one time.

Water Tunnel

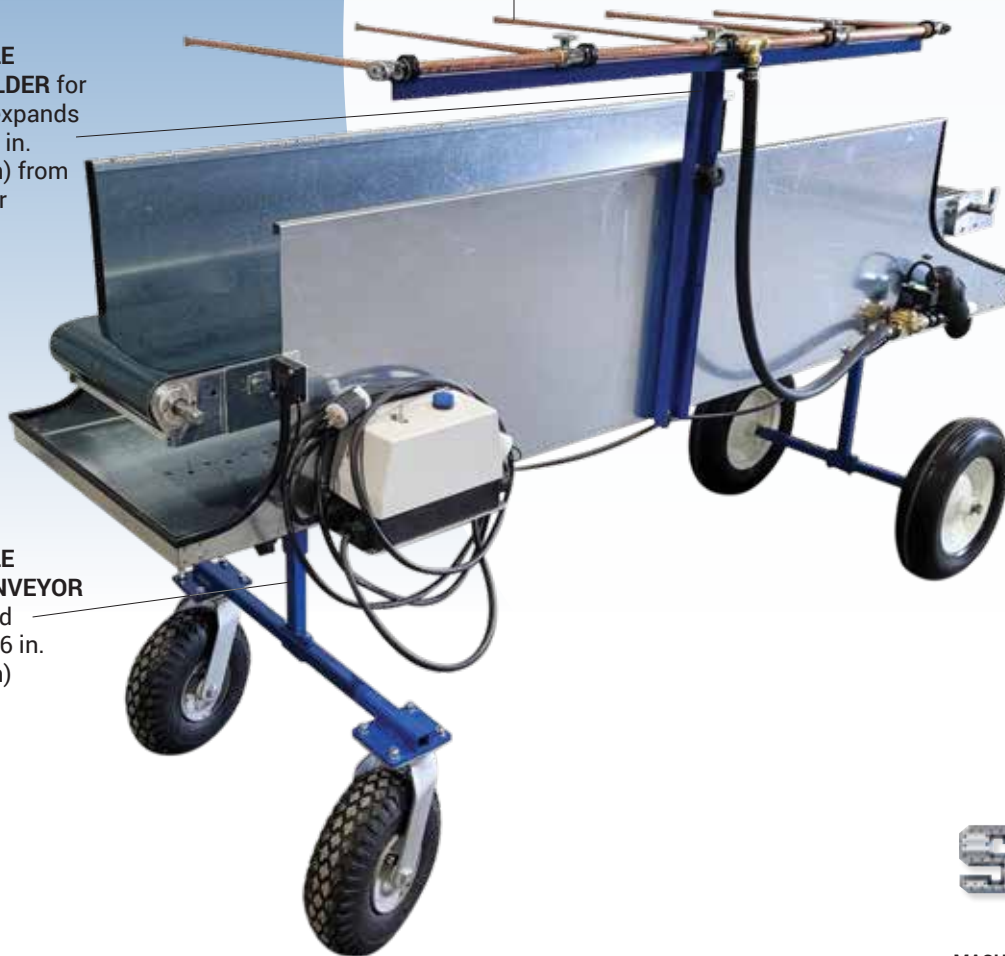

SB04 Water Tunnel provides convenient, controlled watering of multiple containers, such as flats, trays, pots and baskets, all at one time.

- Includes 5 watering bars with an independent valve for each bar.
- Features a variable-speed conveyor that is available with or without a motor, so it can run in line with our conveyors as a standard section.
- A photoelectric sensor and an electric water valve to stop watering when there are no containers on the line.
- It can be connected to other equipment that will control the line starts and stops.
- The motorized water tunnel can drive 2 to 3 sections of the SB10 motor-less conveyor on the exit and/or at the entry.

WATER BARS have an independent valve for controlled watering

ADJUSTABLE HEIGHT HOLDER for water bars expands from 9 to 20 in. (23 to 51 cm) from the conveyor

ADJUSTABLE HEIGHT CONVEYOR can be raised from 26 to 36 in. (66 to 91 cm)
