We mean business

“Words have power. Use them wisely.” At Burpee, words are everything. We say what we mean and mean what we say - and stand behind what we offer.

When it's stated that we have **great tasting vegetables with outstanding garden performance**, you can be confident that this is exactly what you will get. We know this because our products are extensively trialed all across the country to be big performers and ensure optimum growth. Among our product selection, you will also find many top **disease-resistant varieties**. These “superhero” plants are highlighted in this catalog (see page 17).

Burpee offers superior plants so that your consumers can **trust our brand** and be successful gardeners. Growing the right homegrown vegetables and herbs translates to abundant yields and flavorful, creative dishes - meaning our products go from **garden to table**.

Tim Duffin

We also work hard to make **strong, personal connections with our growers**, and to provide all the information and **tools you need** to effectively grow and sell Burpee plants. Many of these marketing tools, eye-catching point-of-purchase materials and other resources are featured in this catalog (and below). Beyond that, we now have the power of the entire Ball Horticultural company behind you. We have expanded our sales force and support team for more opportunities to address your individual needs and questions. We want our success to be your success.

You will find that we mean business. We are serious about what we do and are dedicated to being the very best. Let us help you take consumers from gardening, to cooking, to enjoying their own harvest at the dinner table.

Our tags are color-coded to match our programs - Space Savers, Amazing Veggies, Foodie Fresh, BOOST, Herb and Organic. The tags are eye-catching but also provide essential and detailed growing data. Information on the tags helps with retail sell-through by assisting consumers in making well-informed purchasing decisions, and in planning, planting and maintaining a successful garden.

Garden to table

You may think Burpee is simply in the vegetable, fruit and herb business. While that is 100% true, we also think of ourselves as being in the food business. Because when people are inspired and successful in growing quality vegetables and herbs, they are able to enjoy wholesome, healthy meals at home. And that is really what gardening is all about.

Burpee brings the best from beginning to end. It all starts with purchasing a quality plant, following gardening tips, caring for your plants, harvesting your produce, and then preparing and eating them for an exceptional dining experience.

The benefits of gardening are as plentiful as a harvest. From buying fresh plants to cooking delectable new

produce or trusty favorites, gardening offers countless advantages:

- > Provides healthy, nutrient-rich food that customers choose to grow.
- > Cost-effective and offers convenient access to harvesting fresh, flavor-packed vegetables and herbs.

- > Improves one's well-being by increasing physical activity, acting as a stress reliever and creating a rewarding experience.

We know there are different types of gardeners who seek different benefits and plant features. From those with limited gardening space, to others looking for extra-large or high-nutrition vegetables, Burpee has the right collection for everyone. Our exclusive collections set us apart from the competition:

- > **Amazing** - It's all about extraordinary fruit sizes, as well as late-flowering and highly prolific veggies and herbs.
- > **BOOST** - This antioxidant collection is a perfect match for consumers seeking higher nutrition.

> **Foodie Fresh** - Consumers crave new experiences in food. Burpee provides unique varieties that allow foodies to create culinary delights with vegetables and herbs straight from their own personal gardens.

> **Herbs** - Whether they are grown for cooking, medicinal use, fragrance, crafts or garden displays, our herb selection provides a variety of versatile, savory options.

> **Organic** - We offer a large selection of certified organic vegetables, fruits and herbs.

> **Space Savers** - Restrictions on space and time shouldn't limit modern gardeners. We've put together a collection of exciting vegetables that

are just right for patio containers and window boxes, and answer the need for small-space solutions.

From start to finish, we believe that Burpee offers the cream of the crop. Our tried-and-true vegetables, fruits and herbs provide outstanding taste

and garden performance - for every kind of gardener. On our tags and at burpeehomegardens.com, consumers can find foolproof guidelines for planting, growing and harvesting to create their own unique, healthy, nutrient-filled gardens.

Simply superior

Burpee's **Amazing** veggies collection is just that – amazing. Consumers will get plants that top the charts in quality and produce outstanding proportions and quality – colossal veggies, basket-bursting yields and tantalizing taste. This collection helps your customers grow a blue-ribbon garden.

There are many remarkable vegetables and superior performers in our collection, but a definite favorite is the **Gold Standard Pepper**. It takes a simple stuffed pepper meal to a whole new level of flavor, color and texture. Gold Standard is a must-try variety!

BEAN

Exclusively Burpee!

Beananza

Height: 15 in. (38 cm)

Spread: 10 in. (25 cm)

Days to harvest: 45

Perfect for small-space gardens! This high-yielding dwarf French bean plant offers loads of 6 to 7-in. (15 to 17-cm) beans with good flavor and no strings. It features a long harvest, too, so gardeners get more of these tasty beans over the season.

Blue Lake Bush

Height: 12 to 22 in. (30 to 56 cm)

Spread: 12 to 18 in. (30 to 46 cm)

Days to harvest: 52-65

Get improved flavor and tenderness in a virtually stringless bean. It's a heavy producer over a long season, and is excellent fresh or frozen. We find the beans to be at their peak when 6.5 in. (16 cm) long. Enjoy a bountiful and extended harvest by picking daily.

BROCCOLI

Destiny F1

Height: 24 to 30 in. (61 to 76 cm)

Spread: 24 in. (61 cm)

Days to harvest: 70-75

This mid-early, compact, heat-tolerant broccoli variety features medium-small green beads, a smooth dome and a round shape. A flavorful source of vitamins A and C. Suited for Fall harvest when planted in Summer.

Available as organic.

BRUSSELS SPROUTS

Franklin

Height: 24 to 30 in. (61 to 76 cm)

Spread: 12 to 24 in. (30 to 61 cm)

Days to harvest: 80

These 1-in. (2-cm) sprouts look like miniature heads of cabbage, and are tasty when steamed just to the point of tenderness or enjoyed raw. Their flavor is improved by a few light frosts. Grow Franklin as a Fall crop in the North and as a Fall and Winter crop in frost-free areas. With less-woody stalks than other varieties, whole stem harvest is possible.

CABBAGE

Big Flat Head

Height: 12 to 18 in. (30 to 46 cm)

Spread: 24 to 30 in. (61 to 76 cm)

Days to harvest: 80-85

This flat, specialty cabbage is a standout for its big, mild-tasting leaves - up to 30 per head - that make terrific sandwich wraps. The very sweet, tender, green and white heads each weigh in at 5 to 7 lbs. (2.2 to 3.2 kg). With its very short core and less dense interior for easy slicing and shredding, this is also a great choice for cole slaws and cooking.

Fast Vantage

Height: 12 to 18 in. (30 to 46 cm)

Spread: 18 to 24 in. (46 to 61 cm)

Days to harvest: 59

Fast Vantage matures quickly, resulting in 2.5-lb. (1-kg), medium green heads up to 6 weeks earlier than other cabbage varieties. Try this early-season, uniform cabbage for sauerkraut and cole slaw. Cabbages can take some heat, but they love the cold, which means that you can have a cabbage or two gracing the garden in Spring and Fall, as well as Summer.

Available as organic.

CAULIFLOWER

Snow Crown

Height: 12 to 18 in. (30 to 46 cm)

Spread: 18 to 24 in. (46 to 61 cm)

Days to harvest: 50

Offers quick growth and strong vigor and produces big yields of fully domed white heads up to 8 in. (20 cm) across, weighing 1 to 2 lbs. (454 to 908 g). May be eaten raw, cooked or pickled, and can be frozen. Snow Crown holds its eating quality for up to 10 days in the garden. May show a light pink blush when it matures in Summer's heat. **Available as organic.**

CELERY

Tango

Height: 18 to 24 in. (46 to 61 cm)

Spread: 8 to 12 in. (20 to 30 cm)

Days to harvest: 80

Produces tender, smooth stalks that are super-sweet and never stringy. No part of this popular vegetable will go to waste: the 18 to 20-in. (46 to 51-cm) stalks are great for raw eating, or use them in soups and stews; the seeds can be harvested for flavoring many recipes; and the leaves are great in salads and as a garnish.
