

Antal/Cayson Equipment

**Antal/Cayson Equipment proudly presents
our complete line of equipment**

- ◆ **Save Money**
- ◆ **Increase Productivity**
- ◆ **Made in the USA**

Antal/Cayson Equipment

Antal/Cayson Equipment has been manufacturing equipment for commercial growers for over 20 years. In the early 80's, we were the first company to introduce a manually-operated extractor. Over the years, we have refined the original concept to make the machine not only easy to use but also interchangeable. Along the way, we have introduced machines like the Plug Popper Plus, Plug Popper Grande, and the Tree Popper. The most recent introduction is our dibble system. We offer the Dibble Pro, a lightweight dibble board, and the Dibble Mate foot-operated station.

Dibble Pro

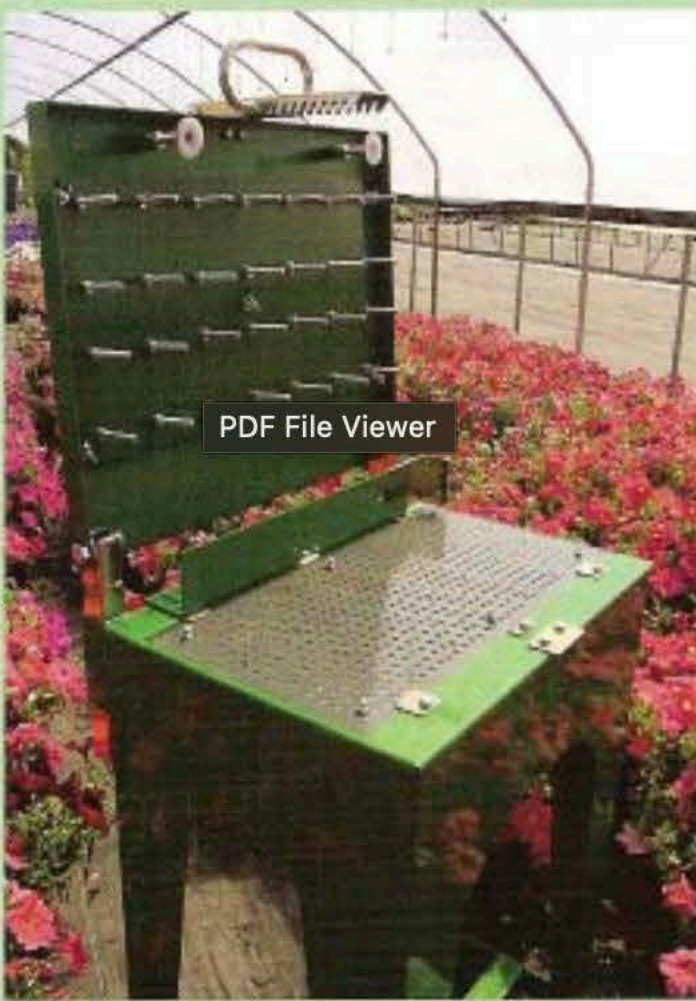

Our handheld aluminum dibble board is custom made to your tray with the option of either plastic or aluminum pins. With it's automatic stripper plate to keep the pins clean, it makes a perfect dibble every time.

Combine a Dibble Mate with any of our dibble boards and have a workstation just for dibbling.

Plug Popper

The Plug Popper dislodges your plugs from their tray in a matter of seconds. No more broken stems or damaged roots. This indispensable horticultural tool works with a simple foot-pedal operation.

No cords, hoses, or motors to maintain. The Plug Popper is easy to use and handles any tray with the swap of an insert. Try it for yourself! You will find that this heavy-duty workhorse pays for itself in a single season.

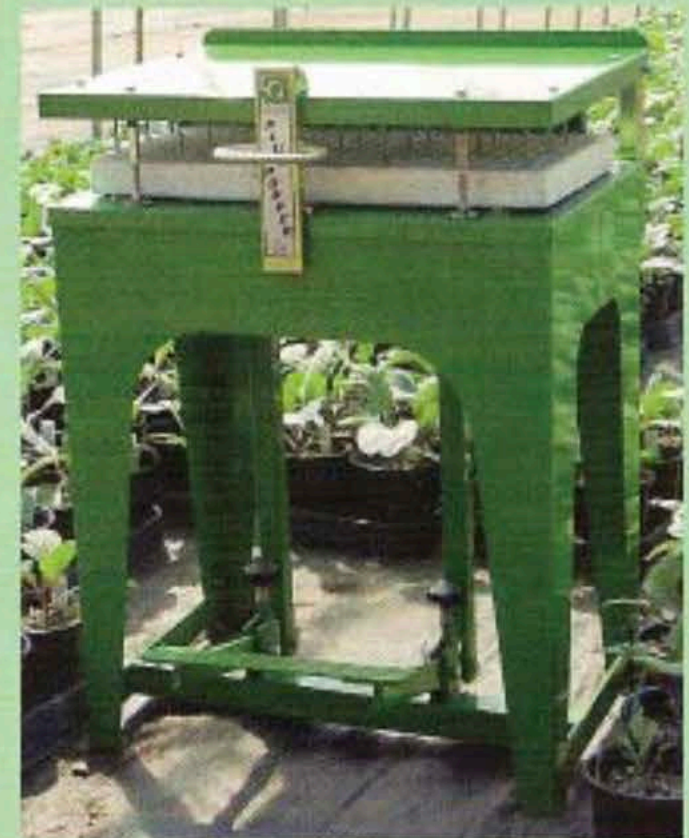

Plug Popper Plus

With its single-button operation, the pneumatic Plug Popper Plus comes with the same standard features as the Plug Popper.

STANDARD FEATURES

- ◆ Interchangeable Design
- ◆ Heavy-Duty Construction
- ◆ Durable Powder Coat Finish
- ◆ Adjustable Stroke Limiter
- ◆ Portable Design
- ◆ Custom Sizes Available

Plug Popper Grande

The Plug Popper Grande includes the same features as the Plug Popper but is designed for larger trays up to 12" x 24".

Tree Popper

The Tree Popper eliminates the difficult and time-consuming chore of pulling seedlings one at a time by hand.

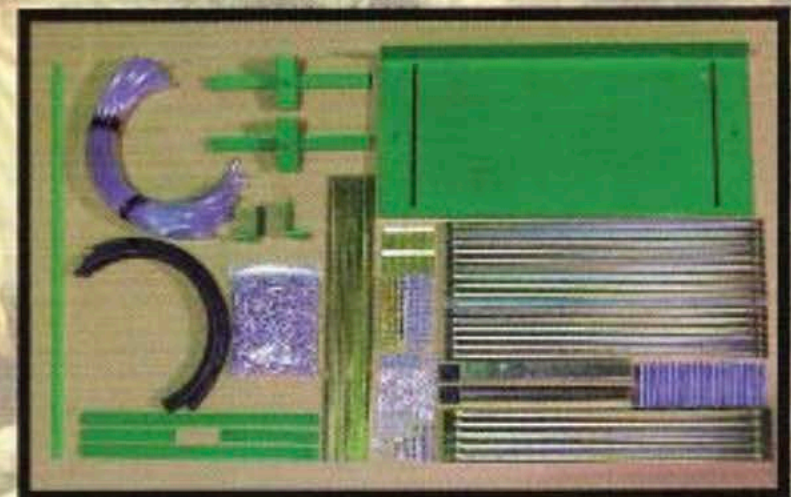

With the touch of a button, the Tree Popper's dual pneumatic cylinders dislodge a full tray of seedlings in seconds.

Econo Popper

The "Econo Popper" is the first universal, hand-operated, portable dislodger. At only 40lbs, it's easy to transport between workstations. The unique pin lock system allows the extraction and hold down pins to be adjusted to fit virtually any standard 10" x 20" tray.

Estimated assembly time is 4 to 6 hours
