

## Tourmaline Fuchsia Bush Mandevilla

The Tourmaline Series is a part of the Diamantina™ Collection of genetic varieties bred by mandevilla and dipladenia expert Lannes of France. Bold and beautiful mandevilla blooms with a unique non-vining habit. This opens up the option to grow in gardens, smaller containers, patio pots and mixed combinations. Although a trellis is not necessary, a support can be used to encourage climbing. A great new option for mandevilla programs!

The only true fuchsia bloom color of mandevilla on the market! Trellis support is needed in larger pot sizes of 10 in. (25 cm) and up.  
DHMI

### General Information

Height: 12 - 24" (30 - 61cm)      Spread: 12" (30cm)      Exposure: Sun

### Propagation Guide

Tray Sizes (cells/tray): 72      Rooting Hormone: Pre-applied before receipt      Average Days with Mist: 14      Pinch: Pinch after liners are rooted.

Average Propagation Time (weeks): 10      Comments: Rooting hormone is not required, cuttings come in treated with transparent product.

### Finishing

Soil pH: 5.3-5.6      Light Levels (fc): High light      Temperature Day: 70-75°F (21-24°C)      Temperature Night: 59°F (15°C)      Fertilization (ppm N): 5.14.36 with 1.2 EC

No. of Pinches: 2-3, First pinch: 3-4 weeks after the liner transplant (Remain 6 leaves below the pinch)      Plant Growth Regulators (S) = spray / (D) = drench: Daminozide 85% (S) or Propiconazol 10% (S)

Pests: Aphids (during early Spring) or Spider mites (during very dry weather)      Diseases: Fusarium, Pythium

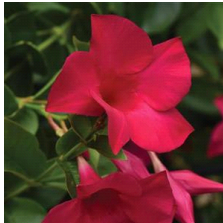

Comments: It is important to manage the temperature following the light intensity. It is essential to choose the right substrate.
